

Robert J. Lewandowski, M.D

Robert J. Lewandowski, M.D., FSIR, is a Professor of Radiology, Medicine, and Surgery in the Feinberg School of Medicine at Northwestern University. He serves as the Director of Interventional Oncology at the Northwestern University Robert H. Lurie Comprehensive Cancer Center. Dr. Lewandowski joined the staff at Northwestern in 2006 upon completion of his fellowship training in Vascular and Interventional Radiology. Dr. Lewandowski is a practicing interventional radiologist who specializes in liver-directed therapy for patients with primary or secondary malignancies of the liver.

Based on his clinical oncology program, he has authored or co-authored > 150 articles for peer-reviewed journals on the application of liver-directed therapies for patients with gastrointestinal malignancies. Dr. Lewandowski also performs pre-clinical oncology research in the Northwestern University Interventional Oncology Laboratory and Center for Translational Imaging. In this capacity, he is developing and evaluating novel oncology therapeutics, delivery mechanisms, and imaging modalities. Dr. Lewandowski's research work has been supported by the National Institute of Health, American Cancer Society, the Society of Interventional Radiology Foundation, and through industry collaboration via the investigator-initiated trial mechanism.
