

Prof. Vinko Vidjak

He gained 27 years of experience in the field of interventional radiology since 1993. During the aforementioned period, he worked in the field of primarily vascular interventional radiology, applying all recanalization procedures (atherectomy, thrombectomy, angioplasty, stenting, ...) in the field of peripheral arteries and veins. In addition, more extensive interventions such as CAS, EVAR, TIPS,...In the field of embolization technique the scope of action is from embolization of aneurysms (visceral branches of the abdominal aorta, main arteries,...) as well as in the area of pulmonary circulation and in the domain of the PCS. He introduced most of these practices as standard practice at his institution. He is a professor in undergraduate and postgraduate teaching, for 10 years he has been the President of the Interventional Radiology Section of Croatia, the educator of most interventional radiologists in Croatia, the organizer of numerous workshops and courses and a lecturer at national and international conferences, and head of the department at his institution.

He is a member of several domestic professional societies, member of CIRSE, member of the Scientific Committee of ICCIR (2018 - 2020) and a member of the CVIR Endovascular editorial board.

In his spare time he is involved in martial arts.
